

Web-based Security Awareness Training

People. Your most valuable corporate asset -- and your single biggest security risk. It's not that your employees don't care; but often they don't know, remember or think about security. The answer is Security Mentor's innovative training, designed for the way people learn and work.

Security Mentor security awareness training combines accurate, relevant security content with top-notch instructional design and superb graphics and animation.

THE SECURITY MENTOR TRAINING MODEL

- ▶ **BRIEF**
10 minute lessons
fit busy schedules
- ▶ **FREQUENT**
Monthly lessons
keep security top of mind
- ▶ **FOCUSED**
Single-topic lessons are
easy to learn and remember

THE SECURITY MENTOR DIFFERENCE

ENGAGING Rich media captures attention

INTERACTIVE Trainees learn by doing

MEMORABLE Compelling games and real-world scenarios

RELEVANT Created by certified IT security pros

FLEXIBLE Web-based training anytime, anywhere

SECURITY MENTOR TRAINING:
Two packages to meet your needs.

Security Mentor CORE

Trains employees in the 12 most critical security awareness topics quickly, economically and effectively. Lessons are delivered monthly including:

- Intro to Security Awareness
- Computer Security
- Email Security
- Reporting Incidents
- Passwords
- Office Security
- Phishing
- Social Networking
- Web Security
- Public WiFi
- Mobile Security
- Information Protection

Security Mentor ADVANCED

Addresses other challenging security issues your employees face with a follow-on curriculum of six lessons:

- Social Engineering
- Acceptable Use
- Safe Disposal
- Privacy
- Working Remotely
- Travel Security

Security Mentor's web-based training is offered either as SCORM-compliant modules hosted on your internal Learning Management System (LMS), or as a service from Security Mentor using our custom LMS. Regardless of how training is delivered, lesson progress and completion is tracked and reported. Managers can view reports of training status by company, group or trainee, and training status reports can be exported in common file formats. Content is customizable and brandable.

But don't just take our word for it. Ask for a demo today.
